BLEEDS & LIVE AREA: Create at least a 1/4" (0.25") bleed beyond trim on all sides. All critical graphics and content must be kept within the Live Area dimensions, preferably .75" for 2-page spreads and 1" for full page spreads.

COLOR FORMAT: CMYK color is required (not RGB). **Black type MUST be 100% black (C=0, M=0, Y=0, K=100).**

Cattlemen's News is printed in a high-speed web printing environment. To help keep costs down, this environment has expected variances to plan for.

Black and white ads and grayscale images should be converted to grayscale using only black and never submitted using all four CMYK colors as a build. This can lead to unbalanced color and undesirable reproduction. Rich black or 4-color black is NEVER recommended and could also lead to registration issues and undesirable output, especially if applied to black text or when white text is reversed out in rich black boxes. (This is especially true of small and thin-faced fine print in both cases.) **Total Area Coverage (TAC), or Ink Density is the total combined % value of the CMYK inks. This value should not be higher than 220% anywhere on the artwork, if it is one can expect the final product to be closed up or look muddy, dark and the ink could cross over to the opposing page in finishing.** TAC over 220% can be an issue in raster images, text or vector art and especially in full page ads with black or dark colored backgrounds and reversed out type.

FILE FORMATS: PDF files preferred – Version 3.0 or newer exported as PDF/X/1-A file with press/print-optimized settings. Fonts must be embedded and NOT subsets. Images must be embedded as well and be at least 300 dpi at actual size (no stretching).

SUBMISSIONS: Material accepted by email to markh@joplinstockyards.com. To submit material via FTP site, contact us at cn@joplinstockyards.com.

FONT SIZE: IN ORDER FOR READABILITY PURPOSES, PLEASE USE A FONT SIZE OF **8 PT OR LARGER** FOR ALL TEXT ON ADS.
